

ISSUES RAISED

- “Waste Segregation” Dec 2019 - Jan 2020
Waste segregation" means dividing waste into dry and wet. Dry waste includes wood and related products, metals and glass. Wet waste typically refers to organic waste usually generated by eating establishments and are heavy in weight due to dampness.
- “Improper Sewage management” Mar 2019 - Nov 2020
If sewage is only partially treated before it is disposed of, it can contaminate water and harm huge amounts of wildlife. Alternatively, leaking or flooding can cause completely untreated sewage to enter rivers and other water sources, causing them to become polluted.

EVENTS ORGANIZED

- “Green Energy Seminar” Jan 2019 - Feb 2019
The energy recovered from the alternative sources is known as the green energy. Electricity requirements of the world including India are increasing at alarming rate and the power demand has been running ahead of supply.
- “GoGreen Meet” May 2018 - Nov 2028
Create an event using green meeting practices with our event management and sustainable consulting. Meet is just the beginning; Green is only half the story.

CHALLENGES COMPLETED

- Tree plantations for 5 Consecutive days.
- Walk 10000 steps daily
- Car pool for 1 month continuously
